Power

- **Power consumption:** (System on and battery charging) 12 W
- **Operating time on battery:** 0.8 hr
- **Battery LED indicator:** Charging - Amber, Not charging - Off
- **Power LED indicator:** Operation - green
- **Power mode supported:** AC powered, Battery powered

Product highlights

High pixel density display

The very best high density screen in the industry displays 88 percent more pixels per square inch than even a high end 17-inch LCD monitor – showing off your treasured photos with the same 'real life' rich detail and vibrant colors as high quality prints.

Rich, vibrant colors

Full color display brings out the best in your photos with vibrant, real life colors by displaying the same full range of colors found in professionally printed photos.

Quality design and materials

High quality design and exquisite materials include a solid stylish stand, designer frame and detailed finishing that convey an impression of value and refined taste, adding luster to the photos displayed on PhotoFrame.

Elegant table-top design

Decor enhancing design melds form and function in an elegant, eye-appealing package that complements refined, stylish home decor - whether you're displaying your photos in landscape or portrait orientation.

Memory card slots

Two memory card readers are built-in for easy viewing and sharing of photos stored in memory cards. One memory card slot accepts Compact Flash I (CF) cards while the second accommodates Memory Stick (MS), SD Card and Multi Media Cards (MMC).

Easy USB connectivity

A USB connector is built into the device for easy and quick downloading photos from a PC.

Create slideshows

A slideshow is a collection of images arranged in sequence for presenting to an audience. Pressing the button and selecting the slideshow function automatically displays all photos stored on your PhotoFrame page-by-page.

Multiple viewing modes

Flexible display modes give you the freedom to display your photos one image at a time, in thumbnail mode for quick, easy searches, or to create a slideshow of your most treasured photos.

Run on built-in battery or AC

AC or onboard battery power give you the choices of operating your PhotoFrame on standard AC power or cordlessly with the onboard rechargeable battery.

On-off timer

A built-in clock turns your PhotoFrame™ on or off at times you select.
